

CymbIoT
Making IoT Smarter

Smart Lights Solution

CymbIoT Smart Lights

SECURITY | DATA | INTEL | COMMUNICATIONS

The CymbIoT Smart Light solution is an integrated street illumination/surveillance/sensor solution that dramatically cuts down on infrastructure and operational costs, and provides the perfect solution for Safe/Smart Cities.

The installation provides energy saving , communication, and wifi capabilities, as well as supporting additional urban sensors (cameras, crowd-meters, etc.) creating seamless Smart City networks.

Fully compliant with European regulations regarding energy consumption, cost-effective, and environmentally friendly, this solution cuts down on greenhouse gases and reduces power consumption by 50% - as well as integrating seamlessly with the urban environment, providing security without disrupting the urban landscape

Smart Lights

Energy saving LED lights
(50%-70%)

Crowd Meters

Measure population density and
identity for intelligence.

Smart Video

Live video feed with video analytics
for automated detection

Smart Audio

High resolution audio with audio
analytics detect events in crowd.

Power Units

Solar panels or battery units that
enable ongoing operations even when
the power grid is down.

Photo Sensors

Optional on/off switch for all systems and
sensors activated by presence of sunlight.

Additional Sensors

Up to 72 additional sensors – from pollution
meters to humidity sensors.

CymbIoT Command & Control

Provides data fusion and management of all
Smart Lights (and Smart City)
sensors and subsystems.

ADDITIONAL INTEGRATIONS

Video Analytics

- Provide parking space data
- Object tracking (theft, terrorism)
- Population density analysis
- Traffic flow monitoring
- ...more

Audio Analytics

- Identify gunshots & trigger 911
- Identify graffiti & direct cameras
- Vehicle classification for traffic control
- Monitor aggression levels
- ...more

Video & Audio Analytics integrated with data from other Smart Light sensors in CymbloT Command & Control::

Security

Event

Window smashed at night.

Detection

Audio analytics in Smart Lights identify event.

Response

CymbIoT C&C analyzes data and implements procedures:.

Direct nearby cameras to towards event.

Turn on all nearby illumination,

Alert police

Alert city information

Send alert via text to area residents.

Infrastructure

Event

Streetlight burns out.

Detection

Smart Light sensors Identify event.

Response

CymbIoT C&C analyzes data and implements procedures:.

Turns on nearby illuminations

Alert city information

Send alert via text to area residents.

Alerts city maintenance

Environment

Event

Dangerous pollution levels.

Detection

Pollution sensors in Smart Lights identify event.

Response

CymbIoT C&C analyzes data and implements procedures:.

Send alert via text to area residents.

Update medical authorities

Alert city information

Update city smart signs

Remote Control Streetlight - complete solution for efficiency , operations, security , safety and smart projects, utilizing the infrastructure to deploy any sensor in the city

Smart City in a Box- support of up to 72 different sensors via CymbIoT C&C for data fusion and integration of Smart Lights into a Smart City.

Manage District Streetlight - create streetlight groups and manage city districts, streets and specific poles.

Reduced Energy Consumption - turn on streetlight only when necessary and uses energy saving working modes for districts with low power requirements.

RCMS Generate Reports – see current and historic smart light status and generate reports.

Video & Audio Analytics- enhance Smart City abilities and systems with advanced analytics.

Instant Infrastructure - All poles are electrified enabling mass service actions such as digital city signs.

Urban Network– Dedicated network enables immediate deployment of sensors, video network enables mass transmission to the city

Supports any light type

Luminaire adapter – “PLUG & LIGHT”

Micro camera + microphone inside

Easy installation & commissioning

LED life 60,000 hours

Individual pole dimming control

CymbIoT
Making IoT Smarter

CymbIoT's mission is to design, implement and deliver advanced Internet of Things (IoT), Video Management Solution (VMS), and Command & Control (C&C) platforms. We empower end users to configure and manage integrated networks of all types and scales - from Smart and Safe Cities, through Transportation Hub security, to Smart Buildings and Enterprise management.

With millions of sensors across numerous verticals using our products to deliver actionable intelligence and real-time response capabilities to customers worldwide - we have the experience, know-how and technology to deliver real world solutions that work.
