

CymbIoT
Making IoT Smarter

**Perpetual License
Model**

CymbIoT

Perpetual License

CymbIoT offers high security customers an effective turnkey model that provides comprehensive IoT capabilities across the organization's internal network- without exposing crucial data and operations to external users and systems.

With the CymbIoT Perpetual License Model, customers receive a 10-year operational license that enables them to install, deploy, integrate, and endlessly expand their IoT internal network, delivering all of CymbIoT's extensive data and operational fusion capabilities- via a fully localized, on-premise installation.

The Perpetua License Model provides users with all of CymbioT's features and modules: from a GIS database to the advanced BI engines, all for a one-time price that puts no caps on the system's ability to add new sensors and systems.

CREATING A SECURE IOT SOLUTION WITH CYMBLOT

Using CymbloT's rapid installation and integration capabilities, integrators and customers can offer users a range of powerful IoT tools and services, connecting all organizational sensors, databases, and operational systems into a single unified interface..

Install CymbloT C&C

Install CymbloT C&C on a local server or servers deployed on an internal network.

Integrate Sensors

Use the friendly CymbloT drag & drop interface to integrate all operational systems and sensors into CymbloT.

Configure System

Configure procedures, reports, and dashboards based on the data and operational needs of the deployment.

Define Permissions

Define viewing, editing, and operational permissions for every system elements and process.

Provide Access

Charge customers monthly/annual fees for concurrent sensor use/users/data.

Apply Ongoing Modifications

Add new systems and sensors, and define new procedures, reports, etc. as the deployment grows.

CYMBIOT C&C SERVICES

Using the CymbloT installation and perpetual license, users can integrate additional services and systems once the initial installation is complete. Additional services can range from simple data and operational fusion of existing systems, through smart interfaces between connected systems, to integration of 3rd party sensors and systems.

Examples of CymbloT Additional Services include:

Security

integration of cameras/motion sensors/audio sensors with alarms and Security personnel.

Resource Management

integration of cameras/motion sensors/volume sensors with A/C, lights etc. for automatic operation in response to presence

Visual Analytics

server-side analytics for existing cameras, adding capabilities such as crowd counting, motion sensing, speed sensing, etc.

Emergency Response

Integrating sensor input with automatic procedures to respond to preset emergency triggers, alert First Responders, etc..

Dashboards

Data and operational input fusion in an executive Dashboard interface for one-sight functional overview.

USERS

VERTICALS & USE CASE EXAMPLES

The CymbloT Perpetual License Model provides enterprises and users with secure operational and communications requirements with an on-premise, turnkey, powerful IoT solution – without compromising data integrity.

Smart Hospital

- Resource Management (power, water, etc.)
- Access Control
- Equipment Tracking
- Patient Tracking
- Safety & Security
- ...and more

Critical Assets

- Surveillance
- Access Control
- Pollution & HAZMAT
- Employee Management
- Anomaly Identification
- ...and more

Smart Bank

- Access Control
- Fire Alarm & Countermeasures
- IP Telephone
- Resource Management (power, water, etc.)
- Access Control
- ...and more

CymbIoT
Making IoT Smarter

CymbIoT's mission is to design, implement and deliver advanced Internet of Things (IoT), Video Management Solution (VMS), and Command & Control (C&C) platforms. We empower end users to configure and manage integrated networks of all types and scales - from Smart and Safe Cities, through Transportation Hub security, to Smart Buildings and Enterprise management.

With millions of sensors across numerous verticals using our products to deliver actionable intelligence and real-time response capabilities to customers worldwide - we have the experience, know-how and technology to deliver real world solutions that work.
