

# Technical Advantages

## Off-the-shelf Product

We can deploy our solution today and you can start using it tomorrow.

## Cloud Independence

We can install our platform on any cloud platform – new or existing.

## No Programming

Drag & Drop environment, fully customized to fit operational needs. CymbIoT offers a complete solution that does not require R&D.

## Hybrid Architecture

we can deploy our product on-premise, on a cloud, or on a hybrid architecture, all based on customer needs.

## Pay as you Grow

beside our on-time fee for setting up your multi-tenant system, there are no additional fees: no data or storages fees.

## Time to Air

Installation & training combined take no more than a few days- your solution will start working on delivering ROI immediately.

## New Integrations

we are committed to a fix price for any NEW integrations needing up to 14 working days

## OEM Option

you can have your own UI , either developed by us or by you through our API.
