Stadium & Event Management

CymbIoT
Stadiums & Events

SAFETY**I** SECURITY **I** VENDORS**I** TICKETING

CymbIoT's approach to Total Stadium & Event Security is based on designing a Concept of Operations around the needs of each specific stadium, based on our deep real-world experience in providing large-scale systems that integrate technology, infrastructure, and the human element.

The CymbIoT C&C Stadium & Event Security Solution is designed to support routine operations and workflows while providing total security. All scanning and identification technologies are invisible and non-intrusive, activating measures only in response to an event.

Our solutions provide security in a multi-stakeholder environment. With modules for tracking suppliers, providers, vendors, visitors, etc., our solution enables authorities to manage and control all stakeholders throughout the event lifecycle.

CymbIoT
Making IoT Smarter

Surveillance Camera

Crowd Meter

Smart Sign

Panic Button App.

Event Update App.

Access Control

Ambulance

Police Unit

CymbIoT Command & Control

Provides data fusion and management of all sensor data.

Making IoT Smarter

ADDITIONAL INTEGRATIONS

Safe Stadium Solution

- Identify criminal activities
- Identify scalpers & illegal entries
- Identify hooligans
- Manage Panic Button alerts & responses
- Alert security
- …more
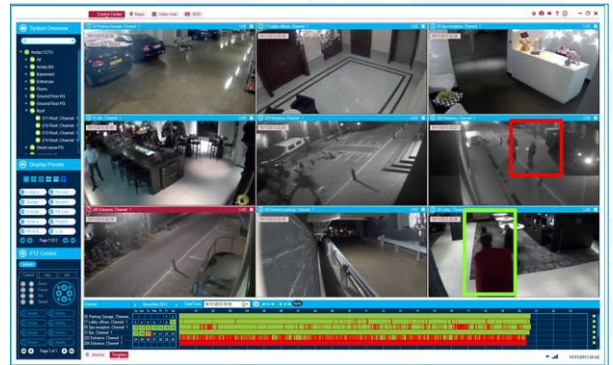

Smart City Integration

- Integration with traffic control
- Integration with public transportation
- Multiple urban C&C integration
- Communicate with urban authorities
- Smart Sign & Smart Phone alerts
- …more

Safe Stadium integrated with data from other Smart City sensors in CymbIoT Command & Control::

Security

Event
Blacklisted hooligan attempts entry.

Detection
Face Recognition identifies hooligan.

Response
CymbIoT C&C analyzes data and implements procedures:.

Informs Stadium Security

Informs Access Control points,

Alert police

Update blacklist.

Traffic

Event
Jam begins to form in a stadium access road.

Detection
Visual analytics identify forming jam.

Response
CymbIoT C&C analyzes data and implements procedures:.

Manage traffic lights to reduce jam.

Update traffic signs to redirect cars.

Alert traffic controllers.

Send text message with suggested route to all pre-registered guests.

Safety

Event
Fire breaks out in stadium

Detection
Smoke sensors identify fire & smoke.

Response
CymbIoT C&C analyzes data and implements procedures:.

Alerts First Responders

Alerts guests to leave via PA system.

Updates Smart Signs with evacuation alerts

Send text message with evacuation route to all system users.

Making IoT Smarter

CymbIoT's mission is to design, implement and deliver advanced Internet of Things (IoT), Video Management Solution (VMS), and Command & Control (C&C) platforms. We empower end users to configure and manage integrated networks of all types and scales - from Smart and Safe Cities, through Transportation Hub security, to Smart Buildings and Enterprise management.

With millions of sensors across numerous verticals using our products to deliver actionable intelligence and real-time response capabilities to customers worldwide - we have the experience, know-how and technology to deliver real world solutions that work.
